CS 491 Homework
TODO

1   Overview

Your responsibility in this homework is to articulate your expectations from this course. You will do so by writing a short blog post about apps you'd like to know how to write by the end of the semester.

2   Requirements

Note that this is an individual homework. To complete this homework, please do the following:

1. Read the syllabus from top to bottom: `http://www.twodee.org/teaching/cs491-mobile/2012C/index.html`.

2. Read `http://blog.twodee.org/?p=3809`.

3. Log in to the course blog using the information emailed to you.

4. Write a new post containing a list of five apps you'd like to know how to write by the end of the semester. Describe the apps clearly with one or two sentences.

5. Categorize your post `fall 2012`, `post mortems`, and `cs491 mobile`.

6. Publish your post. Check that a link appears on the main course page.

3   Submission

Publication of your post mortem finalizes your submission. Revisit the syllabus for the rules on submission and what happens when you don't meet requirements.
